## LEARN MORE ABOUT US

GGO International Management formulates and manufactures sustainable solutions for agriculture. Our products are an integral component for all types of agriculture conventional, organic and hybrid operations. GGO International Management's soil amendments, specialty fertilizers, non-toxic pest control are used worldwide. Our sustainable products bridge the gap separating high efficiency conventional farming from nutrient-dense organic crops; Our products and protocols provide farmers with ways to reduce input costs while increasing yields; helping - rebuild soils depleted or destroyed by years of unsustainable farming practices

## LIQUASUL

### Product Description

GGO LiquaSul supplies needed Sulphur for all crops especially cereal grains – and oilseeds like canola. These crops require amounts of sulfur beyond the levels supplied by conventional fertilizers – foliar sprays of LiquaSul supply the right forms of sulphur in the right place at the right time.

All plants require sulphur for protein production. The essential amino acids cysteine, cystine and methionine – include sulphur as part of their structure. Without sulphur, growth, flowering, fruiting, yields – all cease. A plant's oil production, photosynthesis, enzyme production and other vital processes are dependent on proper sulphur nutrition – are dependent on GGO LiquaSul.

GGO LiquaSul supplies available sulphur in a form easily absorbed by plants: LiquaSul can be combined with any conventional agriculture input, and can be applied as a soil drench or foliar spray.

### Benefits of Use

- Plants require Sulphur for chlorophyll synthesis.
- Sulphur is a constituent of certain amino acids (cysteine, cystine and methionine), which are the building blocks of protein.
- sulphur is crucial for oilseeds – and oil production in all plants.
- Increases crop yields and quality, increasing farm profits.
- Sulphur improves flour quality for baking and milling in breads.
- LiquaSul can be customized for your crop and soil needs.
