LEARN MORE ABOUT US

GGO International Management formulates and manufactures sustainable solutions for agriculture. Our products are an integral component for all types of agriculture conventional, organic and hybrid operations. GGO International Management's soil amendments, specialty fertilizers, non-toxic pest control are used worldwide. Our sustainable products bridge the gap separating high efficiency conventional farming from nutrient-dense organic crops; Our products and protocols provide farmers with ways to reduce input costs while increasing yields; helping - rebuild soils depleted or destroyed by years of unsustainable farming practices

MINERALIZER

Product Description

GGO Mineralizer is an all-natural blended liquid specialty fertilizer, approved for use in certified organic operations. Mineralizer is designed to supply a full set of micronutrients to plants, and correct any micronutrient deficiencies due to soil conditions or lack of nutrients.

Mineralizer provides the micronutrients that conventional NPK fertilizers do not. The micronutrients in Mineralizer are the **'vitamins'** for your crops, and Mineralizer helps your plant use the nutrients your bulk fertilizer supplies. Your crops require these minerals - without them, your crops will not perform their best. Using Mineralizer will increase your yields, reduce losses, and visibly increase the vitality of your plants.

GGO Mineralizer contains balanced quantities of the finest iron, manganese, zinc, copper and boron, derived from mined minerals with a minimum of processing. These balanced minerals are blended with all natural chelating and complexing materials, to ensure uptake by the plant.

Benefits of Use

- Mineralizer can be applied at the same time with other agricultural inputs, as a soil drench, in row, or as a foliar spray.
- Mineralizer improves plant health, growth, and yields, with the greatest results in plants grown in soils with pH above 7, and those high in calcium and phosphorus
- Mineralizer's natural chelation prevents nutrient loss due to runoff.
- Mineralizer raises brix levels in fruits and vegetables.
- Non-toxic Mineralizer can be applied as a foliar spray on farms and orchards with no re-entry time.
- Mineralizer boosts resistance to insect and disease stress
- Mineralizer can be customized for your crop and soil needs.
- Mineralizer is approved with restrictions by AmeriCert International for use in certified organic production.
