LEARN MORE ABOUT US

GGO International Management formulates and manufactures sustainable solutions for agriculture. Our products are an integral component for all types of agriculture conventional, organic and hybrid operations. GGO International Management's soil amendments, specialty fertilizers, non-toxic pest control are used worldwide. Our sustainable products bridge the gap separating high efficiency conventional farming from nutrient-dense organic crops; Our products and protocols provide farmers with ways to reduce input costs while increasing yields; helping - rebuild soils depleted or destroyed by years of unsustainable farming practices

PLANT ARMOUR

Product Description

GGOIM Plant Armour is an all-natural product derived from sustainable materials; and performs many and varied functions for your crops. Plant Armour increases crop yields and health - Plant Armour helps your plant's own defense systems; reducing loss to disease and parasitic nematodes.

Apply Plant Armour as a soil drench before planting any crop. For crops such as wheat, barley, canola and other grains; potatoes, tomatoes, peppers - apply Plant Armour before planting and as a foliar spray during the growth cycle to prevent many common plant pathogens. Plant Armour as a soil amendment chelates nutrients and minerals for plant pickup - and can replace many toxic synthetic farm inputs.

Benefits of Use

- Plant Armour protects crops from a wide range of common pathogens - bacteria, fungi, and viruses.
- Plant Armour as a seed treatment will enhance germination index and increase early shoot growth.
- Plant Armour activates a plant's natural defenses.
- Plant Armour holds nutrients in the root zone and reduces runoff.
- Plant Armour increases crop yields and quality, increasing farm profits.
- Plant Armour is an essential part of a sustainable farm program.
