LEARN MORE ABOUT US

GGO International Management formulates and manufactures sustainable solutions for agriculture. Our products are an integral component for all types of agriculture conventional, organic and hybrid operations. GGO International Management's soil amendments, specialty fertilizers, non-toxic pest control are used worldwide. Our sustainable products bridge the gap separating high efficiency conventional farming from nutrient-dense organic crops; Our products and protocols provide farmers with ways to reduce input costs while increasing yields; helping - rebuild soils depleted or destroyed by years of unsustainable farming practices

REVIVE

Product Description

GGOIM Revive is an all natural blended liquid compound fertilizer, approved for use in certified organic operations. Revive is a fertigation component, a foliar spray component and can be applied through any type of fertigation system.

Revive is also a vital ingredient in many conventional farm programs, being sprayed along with conventional fertilizers – Revive's wetting abilities replace adjuvants in many applications. Hybrid conventional/organic combined agriculture uses Revive in sprayers, along with reduced amounts of nitrogen – reducing costs and fertilizer runoff.

Revive is a blend of hydrolysed Pacific Ocean wild fish proteins, certified organic Louisiana blackstrap molasses, high quality Canadian potassium humic and fulvic acids from the taiga, certified mined minerals, Nova Scotia sea kelp (ascophyllum odosum) and natural fermentation products.

Hybrid Agriculture

Revive provides the chelating and complexing technology that conventional fertilizer solutions (UAN, Potassium chloride, DAP, MAP) do not provide. Revive can be applied with all conventional fertilizers, and will hold nutrients in the root zone, maximizing fertilizer efficiency. Revive provides the organic matter required to hold water in the soil, as well as dissolved nutrients. Reduced water requirements, more efficient fertilizer usage, reduced nutrient runoff, and increased yields are dividends from applying GGOIM Revive along with conventional fertilizer.

Benefits of Use

- Revive stimulates beneficial soil biology populations and increases organic matter content.
- Revive increases plant vitality, reducing crop loss and increasing yield and productivity.
- Revive keeps soluble fertilizers (NO₃⁻, NH₃⁺, PO₄⁻², K⁺) available in the root zone.
- Revive increases successful seed germination and improves seedling growth and health.
- Revive can be applied as a foliar spray to mature plants to increase blossom and fruit set.
- Revive reduces plant stress from frost, drought, and transplant stress.
- Revive is approved by AmeriCert International for use in certified organic production.

Application & Rates

- As a seed and bulb treatment – use a 2% solution of Revive to wet seeds or bulbs thoroughly.
- For row crops at planting – 2-4 litres per acre in row at planting, diluted at least 30:1.
- As a foliar spray on crops – 1-4 litres per acre, diluted at least 50:1.
- As a fruit tree spray – 2-8 litres per acre, diluted 100:1
- In metered drip irrigation and hydroponics systems – use at a rate of 0.5% or 200:1.
- General usage for greenhouses and nurseries – a 2-3% solution as a spray application.
- **IMPORTANT** -- Apply 2-4 litres Revive per acre post-harvest to digest crop residue and release trapped nutrients for the next crop.

Storage, Handling and Usage

- **Shake or agitate product before use.**
- Fill daytank with amount of water for dilution first, then add measured amount of Plant Armour.
- Store out of sunlight in a cool dry area. Do not freeze.
- Close container securely after each use.
- Do not store diluted product. Apply all diluted product within 24 hours.
- Consult your GGOIM representative before mixing Plant Armour with any other product.

Sizes

Products are sold in the following sizes:

55 Gallon Drum

275 Gallon Tote

20 Feet Container

40 Feet Container

THE GGO WAY

GGO International are specialists in providing high quality business advice to all types of agricultural business. We have access to the most up to date information and industry ideas, and we continue to develop bleeding edge technology solutions for agriculture.

All advice given to clients is tailored to their specific needs.
