LEARN MORE ABOUT US

GGO International Management formulates and manufactures sustainable solutions for agriculture. Our products are an integral component for all types of agriculture conventional, organic and hybrid operations. GGO International Management's soil amendments, specialty fertilizers, non-toxic pest control are used worldwide. Our sustainable products bridge the gap separating high efficiency conventional farming from nutrient-dense organic crops; Our products and protocols provide farmers with ways to reduce input costs while increasing yields; helping - rebuild soils depleted or destroyed by years of unsustainable farming practices

XLERATE

Product Description

GGOIM XLErate our latest innovative multi use product. XLErate releases nutrients trapped in a plants rootzone, through an increase in the cation-exchange capacity of the soil. That increase of the CEC causes a healthy plant that gains increased photosynthesis and plant resistance. Another benefit of XLErate is the reduction in your fertility program by 30%-50%, along with herbicides, and fungicides.

XLErate:

XLErate naturally breaks down micronutrients found within compost, making them more readily available to naturally occurring fungi and Greatly accelerating the degradation of the components to the hydrocarbon level. XLErate contains no enzymes or bacteria in it's make up. Instead using what is already present in the compost provides a jumpstart to the decomposition process.

XLErate acts as a wetting agent that reduces the surface tension of a liquid, causing the liquid to spread across or penetrate more easily the surface of a solid. AG-Force IV can make a significant difference in the moisture quality of a soils profile. This in turn can have an integrated effect on the health of the soil life, improved oxygen and water movement and improved nutrient availability.

Benefits of Use

- Prepares the plant for a more robust uptake of minerals and nutrients.
- Protection from diseases, pests and various environmental stresses in modern agriculture.
- Boosts plants uptake thus increasing resistance, and increase yields.
- Releases nutrients without side effects
- Reduces fertility program, herbicide and fungicide needs
- Encourages naturally occurring environmental host to decompose compost
- Accelerates composting process
- Controls odors
- Eliminates soil water repellency
- Enhances movement and infiltration of water in the rootzone
- Helps maximize nutrient availability in soil

Application & Rates

- 12 oz — 24 oz per acre, at the time of planting. 1 gallon treats approximately 10 acres.
- Application rates are a starting point only. Many factors contribute including weather and soil type. Please consult GGOIM representatives for irrigation system recommendations.

Storage, Handling and Usage

- **Shake or agitate product before use.**
- Fill daytank with amount of water for dilution first, then add measured amount of XLErate
- Store out of sunlight in a cool dry area. Do not freeze.
- Close container securely after each use.
- Do not store diluted product. Apply all diluted product within 24 hours.
- Consult your GGOIM representative before mixing XLErate with any other product.
- Perform all foliar applications in early morning or late afternoon. Do not apply in heat of day.

Sizes

Products are sold in the following sizes:

55 Gallon Drum

275 Gallon Tote

20 Feet Container

40 Feet Container

THE GGO WAY

GGO International are specialists in providing high quality business advice to all types of agricultural business. We have access to the most up to date information and industry ideas, and we continue to develop bleeding edge technology solutions for agriculture.

All advice given to clients is tailored to their specific needs.
